Muskan Bhat

User experience designer

ABOUT

UX Designer with 4+ years of experience combining a technical foundation in IT with human-centered design thinking. Dutch citizen based in the Netherlands. I've designed SaaS platforms for Dutch municipalities, translating complex workflows into clear, usable digital experiences, while collaborating closely with product and engineering teams. With a background in front-end development and a focus on data-driven design through my master's, I'm especially interested in simplifying complex systems and making them intuitive and reliable for users.

EXPERIENCE

Decos Software Engineering, Noordwijk - *User Experience Designer*

November 2022–August 2025

- Designed user experiences for cloud-based SaaS products used by Dutch municipalities to manage public services and administrative workflows.
- Translated complex government processes into clear, usable digital workflows for civil servants and citizens.
- Collaborated closely with product owners, developers, and UX designers in Agile teams to deliver scalable product features.
- Contributed to and expanded the design system, ensuring visual consistency and reusable UI components across the platform.
- Applied WCAG accessibility guidelines to improve usability and inclusivity for government digital services.
- Worked with distributed development teams to align design specifications with implementation and support product releases.

Buro Zero Digital Agency, Rotterdam - *User Experience and Front-end Intern*

February 2022–June 2022

- Designed and developed an operational sales and order monitoring dashboard for cb.nl, a distributor for online bookstores in the Netherlands and Belgium.
- Conducted stakeholder interviews and requirement analysis to identify usability issues in the existing CB Order Sync plugin.
- Translated complex backend order data into clear visual dashboards showing order success, failures, and sales trends.

- Designed the interface and implemented the MVP using WordPress, HTML, JavaScript, and Bootstrap.
- Built features including interactive charts, order status monitoring, and searchable order tables.
- Conducted usability testing with internal users to improve navigation, chart interpretation, and error visibility.
- Delivered a working MVP that removed the need for users to inspect server files and improved operational monitoring for webshop owners.
- The project was selected as my graduation thesis.

Pfizer Incorporated, Capelle aan den IJssel - *Content Management Intern*

April 2021–October 2021

- As a Content Management Intern at Pfizer, I set up their Dutch intranet website using SharePoint CMS.
- I configured and maintained the content management system (CMS) to streamline website updates and content management.
- Took several initiatives to contact Pfizer colleagues working on their respective Pfizer intranets (e.g., Germany, Brazil, Denmark) across the world, collaborating with them and learning from their expertise.

Y The Wait, Capelle aan den IJssel - *Front-end Development Intern and Application Tester*

September 2020–February 2021

- As a Front-end Development Intern at YThe Wait, I undertook two projects.
- The first involved developing their online ordering website based on designs from user experience designers using HTML, CSS, Bootstrap, and JavaScript.
- The second project was creating a new company portal in React JS, for which I received a month of training.

July 2020–September 2020

- As an Application Tester at YThe Wait, I focused on testing their mobile and iPad apps for their POS system.
- I optimized the application for multiple devices and platforms and diligently recorded and reported all issues.

Freelance, Capelle aan den IJssel - *Web/WordPress Developer and User Experience Designer*

October 2019–July 2022

- Engaged in freelance work in web and WordPress development for acquaintances and undertook user experience design projects in my spare time, initially as a hobby, which gradually evolved into a serious endeavor.

EDUCATION

University of Applied Sciences Utrecht, Utrecht - *Master Data driven design (Honours)*

September 2025–June 2026 (expected)

Learned to apply applied research, data science, critical thinking, ethical design, and human–AI interaction to create AI-powered, human-centred solutions that work in real-world contexts.

- Client project: Nederlandse Spoorwegen (NS)
    - Currently working on improving OV-fiets adoption by exploring live availability tracking and reservation possibilities to support more confident, seamless travel decisions.
- Check-In App for PhD Candidates: Designed a digital progress-tracking and communication tool to streamline supervision workflows in academia.
- AI Assistant – Breda Municipality: Contributed to the design of an AI-powered assistant to improve citizen interaction and internal municipal workflows.
- Honours in Future of work with AI

Nielsen Norman Group (NN/g) - *UX Certification*

August 2024–present

- Currently pursuing NN/g UX Certification (5-course program).
- Passed 1/5 exams: Practical AI for UX Professionals.

Inholland University of Applied Sciences, Haarlem - *BSc. Information Technology (Honours)*

September 2018–August 2022

- Minors: User Experience Design and, Big Data & AI, Mobile Development
- Honours in Leadership and innovation

Central Board of Secondary Education, New Delhi, India - *Higher Secondary Education*

July 2018
